

A contact fungicide for the control of powdery mildew in strawberries

- Specially formulated product containing Potassium hydrogen carbonate
- Built in surfactants for maximum efficacy, coverage and rainfastness
- Multi-site mode of action, enhancing resistance management
- Based on approved food additive, so no MRL issue
- One day harvest interval
- Compatible with a wide range of Botryticides, e.g. Frupica

Multi-site mode of action

Karma inhibits mycelial growth and causes:

- Total collapse of spores through a combination of dehydration, pH and specific ion effects
- Disruption of the release of hydrolytic enzymes used by fungi to infect plants

The powerful 'wettters and stickers' incorporated into the product ensure that these effects are maximised

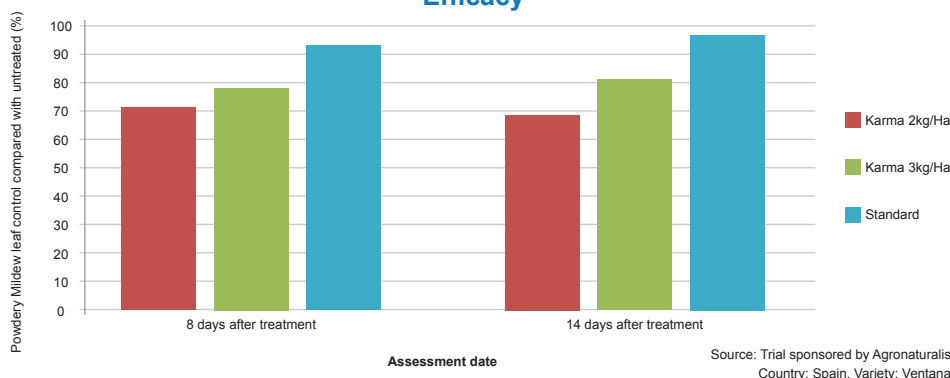

Application

- For best results apply preventatively as part of an ICM anti-resistance strategy
- Application during periods of leaf wetness can maximise Karma's efficacy
- **Apply in at least 600 Litres of water per hectare to achieve a thorough coverage of the crop and safeguard crop safety**

Quality control

Karma is a fully registered plant protection product manufactured to very high quality control specifications. This results in a product of high quality, ensuring maximum efficacy at every application.

Efficacy

Formulation	A water soluble powder (SP) containing 850 g/kg of potassium hydrogen carbonate		
Crops	Strawberry		
Max Individual Dose	3 Kg/Ha	Treatment Interval	7 Days
Max No. Applications	8	Harvest Interval	1 Day
Pack	5 Kg	MAPP no.	16363

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

For further information with regard to the warning phrases and symbols for this product please refer to the product label

Extension of Use:

This extension of the authorised use provides for the use of Karma (M16363) in respect of crops and situations, other than those included on the product label. No efficacy or phytotoxicity data have been assessed and as such the 'extension of use', is at all times done at the user's choosing, and the commercial risk is entirely theirs. Users must be in possession of a copy of the Extension of Authorisation Number: 0901 of 2015 for full details of product extension prior to use.
