

Levington[®] Advance

Levington Advance Alpine, Herbaceous and Cyclamen R-AHC

- ▬ A well drained and low base fertiliser

Description

Levington Advance Alpine, Herbaceous and Cyclamen is a peat reduced growing media product designed to provide a good open well drained structure with low base fertiliser levels. This is suitable for all Alpine, Herbaceous and Cyclamen crops & pots

Terms & conditions

Product specification is subject to change dependent on raw material availability and moisture content in order to maintain consistency, quality and high level of performance. Due to its inherent consistency and potential contamination problems we do not allow green waste on our site. *Bulky raw materials include peat and percentage of professional grade Coir as standard other professional grade raw materials are available and may be substituted to maintain quality, performance and availability. Please speak to your local ICL Technical Area Sales Manager for further information regarding this.

Growing media conductivity is measured using a method of analysis of 1:5 dilution rate.

Benefits

- ▬ A blend of 0-10mm and 6-12mm peat plus 5-12mm pine bark to keep the structure open
- ▬ This product is well drained and has a low base fertiliser
- ▬ Ideal pH levels for plant growth
- ▬ Product contains starter fertiliser

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
