

## Jet 5 a powerful, reliable and flexible disinfectant

- Excellent contact action, controls fungal and bacterial diseases, viruses, algae and moss.
- No residues left on hard surfaces– breaks down into CO<sub>2</sub> and water
- A recognised food grade sanitiser disinfectant
- Ideal in Integrated Hygiene Management strategies
- Useful with notifiable micro-organisms in DEFRA listings
- Proven use: reliable and tested. Convenient to use
- Can be used for disinfection of spray lines
- Contains peroxyacetic acid, hydrogen peroxide, acetic acid, stabiliser and surfactant

### Jet 5: Flexible rates of use

Hard surfaces (Normal sanitation situations)	1 in 125 (i.e. 0.8 L/100 litres of water)
Water treatment	1 in 1000 - 2000
Irrigation equipment (lines/tanks)	1 in 125
Fogging (ideal for potato stores)	1 in 12
Unsealed concrete surfaces	1 in 50

Consult Certis Belchim if you are considering other situations

Avoid using Jet 5 on copper and steel surfaces

Application methods	Knapsack - Power Lance - Dip - Fogging - Pressure Washer		
Mode of action	In solution produces free oxygen radicals that disrupt cells		
Situations/ equipment	All hard surfaces needing disinfection		
Guide rate	1 in 125 dilution.	Temperature	Wide range
	Rate can be varied if required		
Organic use	Yes– full or derogation *	Persistence	Short
Pack	5 and 20 litres	Indicator	Acetic acid smell

\*Contact your organic organisation before use.
