WHEN TO USE

Apply throughout the growing season from February until the end of October. Use as a top dressing (sprinkled on the soil surface), or as a base dressing (worked into the soil using a spade or garden hoe). During dry weather, water before and after application. Do not apply more than 2 times in any one season. Allow 40 days between applications.

DIRECTIONS FOR USE

IMPORTANT

This information is approved as part of the product label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product. Following application there may be darkening or blackening of the turf. This is temporary and will disappear.

RESTRICTIONS

- Apply only to established turf. Do not allow granules or dust to contact foliage of neighbouring vegetation or waterbodies. Do not use in drought, freezing conditions or when rain is imminent.
- If spilt on paving, concrete etc., brush off immediately to avoid discolouration. If no rain falls within 48 hours of treatment, irrigate treated area. Dead moss can be removed by raking or scarifying 7-14 days after treatment. Re-treatment may be necessary for heavy moss infestation, or if moss returns.

APPLICATION

Apply when moss is actively growing and soil is moist. Grass should not be cut 3 days before treatment and not cut again until at least 4 days after treatment. Mark out areas to be treated and apply evenly at 80 grams per square metre. Apply with shaker pack, by hand or with suitably calibrated granular spreader.

IMPORTANT INFORMATION

Maximum Individual Dose	Maximum Number of treatments	Application Timing	Application interval	Situations
80g / Sq.m	2	When moss is actively growing	40 days	Amenity grassland & managed amenity turf

Analysis

Total Nitrogen (N)	4.0%
Total Iron (Fe)	2.8%

Use pesticides safely - read the label.

MOSS CONTROL TECHNIQUES

The key to reducing moss is to have an effective all-year round management strategy incorporating the use of Sinclair Lawn Sand. The following non-chemical techniques can be used to help reduce moss;

- Ensure the turf is healthy, weed, disease and pest free. This can be helped by fertilisation and regular maintenance.
- Soil aerating of the lawn to help to encourage the free passage of water & nutrients through the soil.
- Raking/scarifying to remove dead mosses and removal of fallen leaf debris to prevent the build-up of fibrous material which encourages weed and moss growth.

If all of these cultural management practices are followed in harmony with applications of Sinclair Lawn Sand then the reduction of mosses can be successfully achieved.

IMPORTANT INFORMATION

SAFETY PRECAUTIONS

Operator Protection:

- **WASH HANDS AND EXPOSED SKIN** before eating and after work. Keep away from children and pets. Engineering control of operator exposure must be used where reasonably practical in addition to the following protective equipment:
- **WEAR SUITABLE PROTECTIVE GLOVES** when handling the product or applying the product.
- However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

Environmental Protection:

- **DO NOT CONTAMINATE WATER** with the product or its container.

Storage and Disposal:

- **KEEP IN ORIGINAL CONTAINER**, tightly closed in a safe place.
- **EMPTY CONTAINER COMPLETELY** and dispose of safely.
- **KEEP PRODUCT AWAY FROM CHILDREN AND PETS.**
